COMPACT POWER

Flexible grates for anything you cook. Steel floating rod grates are standard but you may choose cast-iron, fish or meat grates at no extra charge. The grates can be tilted in three separate positions.

Powerful 36,000 BTUH H-burners. Under the stainless steel radiants, our heavy-duty, clog-proof burners can be configured to burn natural or LP gas. Each burner is independently controlled. A crossover pilot makes lighting easy. 1" NPT rear gas connection.

Wide array of options. Add options like work decks with pan cutouts for sauces, overhead back shelf, and log holders.

Glo-Stones for ambiance and flavor. Glo-Stones are optional.

Bakers Pride® L-R series charbroilers offer a low-profile design and 36,000 BTUH H-burners for energy efficiency and broiling performance. Models come in a range of sizes from 24" to 84" wide.

A continuously lit, cross-over pilot tube system makes lighting burners a breeze. Stainless steel radiants come standard, as do steel floating rod grates, which may be adjusted in four separate tilting positions for increased flexibility and temperature control. Fully insulated, double walls help with heat retention, while stainless steel interiors and exteriors make these charbroilers both durable and easy to clean.

This series also offers many options to suit your needs, such as Glo-Stones for enhanced flavor and work decks with pan cut outs for added convenience.
